

# HSE TRAINING OF PERSONNEL ENGAGED IN SHIP RECYCLING

## COURSE OBJECTIVES

To enhance the awareness of the workers and supervisors with regard to the risks involved in ship recycling industry and to develop an understanding of the safe work practices including practical drills on fire-fighting, oil spill prevention, basic first aid and complying with the requirements relating to Inventory of Hazardous Materials (IHM).

## ABOUT THE COURSE

India is a world leader in ship recycling and the Hong Kong Convention has been a game changer in this segment. In addition, the EU has also spelt out its own guidelines for certification of Ship Recycling Facilities and corresponding training requirements. The course can be delivered in Hindi or any local (Indian) language.

## PARTICIPANTS

Workers and supervisors engaged in ship recycling industry.

## DURATION

Four days
