

South African Maritime Safety Authority

Ref: SM6/5/2/1
SM12/8/8/3/P

Date: 2 February 2017

Marine Notice No. 5 of 2017

Approved SAMFAS Stations

TO SAMFAS SERVICE STATIONS, SHIP OPERATORS, MASTERS, SHIPS' AGENTS AND PRINCIPAL OFFICERS

Marine Notice No.13 of 2016 is cancelled

Summary

This marine notice lists the approved marine fire service (SAMFAS) stations as at 31 January 2017

- 1 Regulation 118(3) of the *Life-Saving Equipment Regulations, 1968*, requires all firefighting appliances installed on South African ships to be serviced at intervals not exceeding 12 months by a SAMSAMARITIME SAFETY AUTHORITY-approved marine fire service station.
- 2 SAMSAMARITIME SAFETY AUTHORITY, has amended the *South African Maritime Code of Practice for Marine Fire Service Stations (SAMFAS)*, which was initially prepared in collaboration with the industry as the *Code of Practice for Marine Fire Service Stations (DOTFAS Code)*. The code sets out the standards for the servicing of firefighting appliances; these standards satisfy the requirements of the applicable regulations.
- 3 A firefighting appliance that has been serviced and certified by a marine fire service station approved in terms of the SAMFAS Code will be accepted as having met the requirements of Regulation 118(3).
- 4 The Annex lists the approved marine fire service stations (SAMFAS stations).
- 5 At the time of publication of this marine notice, some marine firefighting service stations are close to the date of expiry of their approval, the onus to renew is left to the service providers. It has been noted that some crafts/boats are operating on inland water areas where the service stations may not be SAMSAMARITIME SAFETY AUTHORITY approved; such service stations are still expected to be SABS approved and are urged to register with SAMSAMARITIME SAFETY AUTHORITY. Owners, managers, masters and skippers are advised that should firefighting appliances be serviced at a station which has not been approved or whose approval has lapsed, the surveyor may reject this equipment and require it to be re-serviced at an approved station.
