

INFORMATION BULLETIN No. 173

Electronic Record Keeping Systems

Guidance and Instructions for Bahamas Recognised Organisations, Bahamas Approved Nautical Inspectors, Ship Owners, Managers and Masters

1. Purpose

- 1.1. This Bulletin is intended to provide guidance on the use of electronic record keeping systems, including log books and record books, on board ships registered in The Bahamas.
- 1.2. This Bulletin also describes the procedure for applying for approval of such systems by the Bahamas Maritime Authority (BMA).
- 1.3. This Bulletin should be read in conjunction with International Maritime Organization (IMO) Resolutions [A.813\(19\)](#)¹ & [A.916\(22\)](#)² and IMO Circular [MSC/Circ.982](#)³.
- 1.4. Information on electronic charts and publications is provided in [BMA Information Bulletin No.51](#)⁴.

2. Application

- 2.1. This Bulletin applies to all Companies wishing to use electronic record keeping systems on board Bahamian ships. For the purposes of this Bulletin, the "Company" is the entity responsible for the management of the ship in accordance with the ISM Code. For ships to which the ISM Code is not applicable, the Company is the Managing Owner in accordance with Section 52 of the Merchant Shipping Act.

3. Introduction

- 3.1. Bahamas legislation and other relevant international Conventions require that specific actions, events and operations be recorded in a log book or record book held on board the ship.
- 3.2. The BMA supports efforts to reduce administrative burdens and recognises the growing use of electronic record keeping systems on ships, including log books and record books.
- 3.3. Accordingly, the use of electronic record keeping systems for the recording of information required by national legislation and international Conventions is permitted, subject to compliance with this Bulletin and BMA approval.
- 3.4. There are several electronic record keeping systems available in the market that fully or partially cover these requirements. A number of such electronic record keeping systems have already been approved by the BMA for use on specific Bahamian ships
- 3.5. For the purposes of this Bulletin, electronic records are categorised as:
 - i. "Official" records required by Bahamas legislation or international Conventions and Codes;
 - ii. "Unofficial" records that are not required by national legislation or international Conventions and Codes but are commonly used.
- 3.6. The following official records may be maintained in an electronic record keeping system:
 - i. Bahamas Official Logbook Part I;
 - ii. Bahamas Official Logbook Part II (Passenger Ships only);
 - iii. Articles of Agreement or Seafarer's Employment Agreements;
 - iv. Records required by Regulation 17 of Chapter IV of SOLAS;
 - v. Records required by Regulation 28 of Chapter V of SOLAS;
 - vi. Ballast Water Record Book;
 - vii. Compass Error Book
- 3.7. Records required under Annexes I, II, V and VI of MARPOL may also be kept electronically, subject to section 5 of this Bulletin.
- 3.8. The following unofficial records may be maintained in an electronic recording system:

- i. Bridge log book (also known as Chief Officer's Logbook);
- ii. Engine room log book;
- iii. Biofouling Record Book

4. General Requirements for Electronic Record Keeping Systems

4.1. This section outlines the requirements for electronic record keeping systems that are intended to replace paper records of actions, events and operations on board.

4.2. All electronic record keeping systems used to record official records are to be approved by the BMA.

4.3. Electronic record keeping systems used to record official records must capture the information required to be recorded in paper log books and record books by the relevant legislation or international Convention.

4.4. The minimum requirements for electronic record keeping systems are as follows:

4.4.1. Electronic Record Keeping System Workstation:

- i. The workstation should take in to account relevant ergonomic design criteria such as provided for in MSC/Circ.982.

4.4.2. Updating of Software:

- i. Arrangements for software replacement, update or upgrade should be effectively implemented under a documented system.
- ii. The Company is responsible for ensuring that electronic record keeping systems are maintained to the latest standards required by the BMA or the relevant international Conventions.

4.4.3. Client/Server Installation:

- i. Where the system can support a client/server installation, the server should be capable of recording data from clients using multiple workstations simultaneously.

4.4.4. Minimum Data Reporting & Exporting Requirements:

- i. The system must be capable of reproducing records in hard copy (i.e. printed out);

- ii. The system must be capable of producing reports in PDF format;
- iii. Where data export is provided, the system should allow the data to be exported to another system in XML or other internationally standardised format;
- iv. Nothing within the system, or the contractual arrangements between the Company and equipment supplier, shall prohibit the provision of information to duly authorised officers of an Administration, inspectors, surveyors, auditors, investigators, etc. relating to the discharge of their duties.

4.4.5. *Recording of Entries:*

- i. All users must have a unique username and password for accessing the system, or other form of login that is unique for each user;
- ii. The identity of the user making entries into the system must be clearly identified;
- iii. Where automated recording of navigational and machinery events is featured, the electronic bridge or engine room log book or data logger must be able to record relevant events, along with the necessary inputs, in real time.
- iv. All entries must have a stamp or input with date and time (UTC and local time on board);
- v. The system must not allow the deletion of any entries. Any subsequent amendments or corrections to an entry must be clearly identifiable (e.g. by crossing through the original entry with a line) and show the identity of the user making the amendment or correction;
- vi. The system must be capable of electronically registering the signature or endorsement of the Master and other responsible Officers on all relevant entries;

4.4.6. *Back Up and Recovery of Entries:*

- i. The power supply to the system should be fed from both the main and emergency source of power;
- ii. The system should be capable of making secure copies or backups of the entries to ensure that the information will not be lost if the system fails. The system must be able to recover data from the copies or backups.
- iii. The system should be able to export all entries to a standard removable storage device, such as a USB memory stick;
- iv. Official records shall be retained by the system for at least the minimum period specified in the relevant legislation or international Conventions – a guide to retention periods is provided in the Annex.

- v. Unofficial records shall be retained by the system for the period established by the Company.

5. Requirements for Specific Records

5.1. *Official Log Book Parts I & II:*

- 5.1.1. The Merchant Shipping Act does not specify that the Official Log Book has to be a hard (paper) copy, only that a log book is kept and that specific entries are recorded, as listed in the Merchant Shipping (Official Log Books) Regulations 1981.
- 5.1.2. Accordingly, information that is normally recorded in the Official Log Book Part I or Part II may be maintained in an electronic record keeping system, provided that all information required in the relevant section of the hard copy Official Log Book Parts I & II is recorded.
- 5.1.3. Any information in a section of the Official Log Book Parts I & II that is not recorded in an electronic record keeping system must be maintained in a hard copy Official Log Book.
- 5.1.4. In cases where some information is in a hard copy Official Log Book and some is in an electronic record keeping system, the hard copy Official Log Book shall contain a statement indicating where the information recorded electronically is stored.
- 5.1.5. All sections of the Official Log Book that are maintained electronically must be capable of being printed out in the same layout as the hard copy Official Log Book and exported in PDF format.
- 5.1.6. Printed pages must be signed by the Master as a true and complete copy of the corresponding entries in the electronic record keeping system.

5.2. *MARPOL Annex I – Oil Record Book Parts I & II*

- 5.2.1. Oil Record Book Parts I & II may be kept in electronic format, provided that:
 - i. Entries cannot be deleted;
 - ii. Any changes to existing entries are clearly shown, along with the identity or electronic signature of the person that made the change;
 - iii. The system is auditable;

- iv. The record, including any changes, is printed out weekly and the hard copy physically signed by the Master and Chief Engineer;
- v. The weekly printed pages are in the format specified in the Convention for the Record Book; and
- vi. The weekly pages can be exported in PDF format.
- vii. Printed Pages are to be maintained onboard for the period noted in MARPOL and the annex of this bulletin.

5.3. *MARPOL Annex II – Cargo Record Book for Ships Carrying Noxious Liquid Substances in Bulk*

- 5.3.1. The Cargo Record Book for Ships Carrying Noxious Liquid Substances in Bulk may be kept in electronic format, provided they meet items i. to vi. in paragraph 5.2.1.

5.4. *MARPOL Annex V – Garbage Record Book Parts I & II*

- 5.4.1. Garbage Record Books Part I & II may be kept in electronic format, provided they meet items i. to vi. in paragraph 5.2.1.

5.5. *MARPOL Annex VI Record Book*

- 5.5.1. Records required under MARPOL Annex VI may be kept in electronic format, provided they meet items i. to vi. in paragraph 5.2.1.

- 5.5.2. MARPOL VI records may also be kept in the engine room log.

5.6. *Crew Management System:*

- 5.6.1. Where electronic management of crew articles is enabled, the system should be capable of recording information relevant to the crew list, including the following:

- i. Full name of crew member;
- ii. Home address;
- iii. Age;
- iv. Place of Birth;
- v. Nationality;
- vi. Passport Number;
- vii. Next of Kin;
- viii. Position on board;
- ix. Certificate of Competency details;
- x. Place and date of embarkation;
- xi. Place and date of disembarkation.

6. BMA Approval of Electronic Record Keeping Systems

- 6.1. When a Company selects an electronic record keeping system for use on a ship registered in The Bahamas, the Company shall apply to the BMA for approval.
- 6.2. The Company shall provide the following information when applying for approval:
 - i. Name and Official Number of all ships that will have the system installed;
 - ii. A statement from the Company confirming the following:
 - The installed system complies with the specific requirements set out in this bulletin;
 - The crew has been appropriately trained in the management, use and operation of the system, in compliance with Regulation I/14.1.4 of the STCW Convention;
 - The routines and processes for the conservation and maintenance of the entries in the system comply with relevant requirements and guidance and procedures for data entry, extraction and retention are incorporated in the Safety Management System;
 - iii. A list of logbooks and record books that will have their entries captured in the electronic record keeping system;
 - iv. System manufacturer's declaration specifying that the system is installed according to approved existing requirements and that the installed system has been tested and is operating correctly.
- 6.3. The BMA may require the Company or the electronic record keeping system vendor to demonstrate the features of the system to ensure that it complies with the requirements of this Bulletin. The BMA will advise if this is required at the time of application.
- 6.4. On satisfactory review of the information in paragraph 6.3 and payment of the appropriate fee, the BMA will issue a *Document of Approval for Electronic Record Keeping Systems* for each ship using the system.
- 6.5. The Document of Approval will list the official records permitted to be stored by the system and must be kept on board each ship using the system, for presentation to duly authorised officials when requested.

- 6.6. Each Document of Approval for Electronic Record Keeping Systems will be valid for five (5) years from the date of issue and will be subject to the ship being managed by the Company noted on the approval document.
- 6.7. The Company is to notify the BMA of any changes to the system or the procedures related to its use in the Safety Management System that affects the Document of Approval.
- 6.8. The availability of the Document of Approval will be verified at Bahamas annual inspections.

7. Companies with Existing Electronic Record Keeping Systems

- 7.1. Companies that already have a *Statement of Acceptance* issued by the BMA for all ships in their fleet are required to apply for a *Document of Approval for Electronic Record Keeping Systems* for each individual ship by not later than the first Bahamas annual inspection after 01 March 2018 but in any case, not later than 31 December 2018.
- 7.2. Companies that already have Statements of Acceptance issued by the BMA for individual ships in their fleet are required to apply for a Document of Approval for Electronic Record Keeping Systems for each ship by not later than the first Bahamas annual inspection after 01 March 2018 but in any case, not later than 31 December 2018.
- 7.3. Companies that already use electronic record keeping systems that have not been approved by the BMA are required to apply for a Document of Approval for Electronic Record Keeping Systems for each ship by not later than the first Bahamas annual inspection after 01 March 2018.
- 7.4. Applications shall contain the information specified in section 6.

8. Provision of Data to New Managers or Owners

- 8.1. The international Conventions require certain records to be retained by the ship for specified periods, as indicated in the Annex.
- 8.2. Accordingly, Companies using electronic record keeping systems must provide the relevant records to the new Company, that cover the required minimum retention period.
- 8.3. The records may be provided as:

- i. a PDF or XML file; or
- ii. printed out; or
- iii. in a data format that can be used by the new Company's system.

8.4. In all cases, the ability to present the records to duly authorised officers upon request must be available on board the ship.

9. Fees

9.1. The fees for the issue of a Document of Approval for Electronic Record Keeping Systems are as follows:

- i. Review for approval of system - \$150 per hour or part thereof
- ii. Issue of initial Document of Approval - \$300
- iii. Renewal of Document of Approval - \$300

10. Revision History

Rev.0 (12 January 2018) – First issue

ANNEX – Retention Periods for Entries

The following table provides minimum retention periods for official records.

Record Type	Minimum Retention Period	Reference
Official Log Book Part I	7 years after entry made	s.145(1) Merchant Shipping Act
Official Log Book Part II	7 years after entry made	s.145(1) Merchant Shipping Act
Articles and Crew Agreements	7 years after expiry	s.82(h) Merchant Shipping Act
Oil Record Book Part I	3 years	MARPOL Annex I Reg.17.6
Oil Record Book Part II	3 years	MARPOL Annex I Reg.36.7
Noxious Liquid Substances Record Book	3 years	MARPOL Annex II Reg.15.5
Garbage Record Book Part I	2 years	MARPOL Annex V Reg.10.3.5
Garbage Record Book Part II	2 years	MARPOL Annex V reg.10.3.5
Record of navigational activities under SOLAS V/28	1 year	A.916(22) para. 4.4
Radio records required by SOLAS IV/17	1 year	BMA requirement
Ballast Water Record Book	2 years onboard 3 years by Company	BWM Convention Regulation B-2.2
