

PORT FACILITY SECURITY INTERNAL AUDITOR COURSE

COURSE OBJECTIVES

Those who successfully complete this course will be able to discharge the responsibility of internal security auditor of the port facility, which typically includes:

- Conducting internal security audit of the port facility;
- Understanding the audit techniques of the Port Facility Security;
- Verification of compliance with the ISPS Code within the various departments in the Port Facility;

ABOUT THE COURSE

An effective internal audit ensures better compliance with any standard. The internal audit being from the same system has the best understanding of the processes and, therefore cannot only contribute towards identifying the grey areas but also address the best practices being followed by different departments, which can be implemented across the organization, thereby contributing to the overall improvement in the system. The course will empower the participants to understand the process of security audit of the port facility for the compliance of ISPS Code by the port facility.

PARTICIPANTS

Shore-based personnel, who have completed the PFSO training are eligible to take this course. Upon completion of the course, the participants will be able to undertake the internal audit of the port facility security.

DURATION

Two days

KEY TOPICS

- Maritime security policies: Relevant international conventions.
- Recap on the ISPS Code and application to the Port Facility.
- Understanding the audit process
- Security Audit & reporting of non-conformities
- NC writing, Corrective and Preventive Actions
