

CERTIFICATE COURSE IN BUNKERING OPERATIONS AND MANAGEMENT, FUEL MANAGEMENT

COURSE OBJECTIVES-

The Bunkering Safety training covered the latest regulations, operational management, task allocation, and safety requirements related to bunkering operations. Participants were familiarized with proper bunkering procedures, fuel handling practices, and monitoring methods to ensure safe and efficient fuel transfer operations.

ABOUT THE COURSE-

This course provides comprehensive training in bunkering safety, focusing on the latest regulations, management of bunkering operations, task assignment, and understanding. Participants will gain detailed knowledge of safe bunkering procedures, regulatory compliance, and best practices for managing bunkering operations efficiently. The course emphasizes the importance of clear task assignments and understanding among crew members to ensure smooth and safe operations.

Additionally, participants will learn techniques for fuel use monitoring and optimization to enhance operational efficiency and cost-effectiveness. Through practical exercises, real-world scenarios, and case studies, the course aims to equip participants with the skills necessary to handle bunkering operations safely and in compliance with current regulations, while optimizing fuel usage.

PARTICIPANTS-

Engine Room Team

DURATION-

One day

KEY OBJECTIVES-

- Understand safe and efficient bunkering practices
- Familiarization with fuel oil sampling requirements and procedures
- Planning, Execution, and monitoring of bunkering operations
- Compliance with Regulations and Documentation
- Recent Incidents / Loss
- Testing of Equipment
- Fuel Management Practices
- Fuel Management Systems

TRAINERS

SHASHI GANGHAS

Mr. Shashi, a Senior Technical Superintendent with over 12 years of shore-based experience and 24 years of maritime expertise, brings a wealth of knowledge to his training role. With a background encompassing technical management, inspections, audits, and quality assurance, he possesses a deep understanding of vessel operations. His extensive sailing experience as a Chief Engineer on Oil and Chemical Tankers adds practical insights to his training methodologies. Mr. Shashi's proficiency in preventive maintenance, planned repairs, and dry-docking of large ships, coupled with his leadership skills and multicultural experience, uniquely equip him to deliver comprehensive and effective training programs in the maritime industry.
